SUMMARY

Final-year Computer Engineering student (CGPA 8.45) who starts with the user problem, defines the metric that matters, and ships. Found the Month 3 churn window in 540K+ transactions and built the case for moving retention spend; framed a fraud model around the cost of missed fraud versus false alarms; and built and launched a role-based web product. Brings growth experience from two organisations and a personal content brand, plus enough engineering depth (React, Node.js, FastAPI, SQL) to work closely with developers.

PRODUCT SKILLS

- **Discovery and analytics:** problem framing, KPI definition, cohort and retention analysis, funnel and engagement analysis, EDA
- **Experimentation:** A/B testing, hypothesis testing (chi-square, t-test), regression, metric trade-offs (recall vs false-alarm rate)
- **Communication:** stakeholder reporting, self-serve dashboards (Power BI, DAX, Tableau), turning model output into rules non-experts can act on
- **Tools:** SQL (MySQL, PostgreSQL), Python, Excel, Google Sheets, Figma, Canva, GitHub
- **Technical:** React, Node.js, Express, FastAPI, MongoDB, Docker, REST APIs, machine learning

EXPERIENCE

Data Analyst Intern — Jambudweep Shodh Kendra Pvt Ltd

Aug 2026 – Present

- Analyse multi-year electoral data across constituency, Lok Sabha and Rajya Sabha elections to surface voting-pattern shifts and long-term trends.
- Turn raw records into trend visualisations and summary reports for decision-makers; validate predicted trends against historical results with correlation tests.

Growth & Content Strategist — Aasira: STEM Beyond Labels

Jul 2024 – Feb 2026

- Owned the brand's social presence end to end; shipped 10+ content pieces and grew audience engagement 35%.
- Built weekly growth dashboards across social and web, and used them to reshape the content mix and posting schedule.

Growth & Engagement Volunteer — Google Developer Groups on Campus

Oct 2024 – Sep 2025

- Used reach and timing data to find the best-performing content and posting windows, raising event attendance 40% and content engagement 30%.

Independent Creator — Personal Content Brand

Ongoing

- Grew a personal account to 13.4M+ monthly reach (May 2026) by running continuous format experiments and iterating on what performed.

PRODUCT PROJECTS

Customer Churn & Cohort Retention | SQL, Python, statsmodels, Power BI | [GitHub](#)

- **Problem:** when do customers leave, and where should retention spend go? Built acquisition cohorts and retention curves from 540K+ transactions.
- **Outcome:** identified Month 3 as the critical churn window, validated it with chi-square and t-tests, and quantified revenue at risk per cohort to make the case for reallocating retention campaigns.

Credit Card Fraud Detection | XGBoost, SHAP, FastAPI, Docker | [Live Demo](#) · [GitHub](#)

- **Problem:** with fraud under 1% of 284K transactions, accuracy hides failure; defined success as catching fraud without flooding reviewers with false alarms.
- **Outcome:** 87.5% recall at a 0.15% false-alarm rate, an estimated £5,338 in prevented losses, and SHAP risk drivers turned into alert rules; shipped as a live API.

ShipTrack — Logistics Tracking Platform | React, Node.js, Express, MongoDB, JWT | [GitHub](#)

- Built and launched a role-based web app with a tailored view for each user type and a live shipment-status timeline; restricted each role to its own data at the database layer. Live on Vercel and Render.

Sales Performance KPI Dashboard | Power BI, DAX | [GitHub](#)

- Designed a self-serve dashboard (MoM growth, rolling averages, rep rankings) across 4 regions and 3 categories; surfaced discount leakage linked to an estimated 8–12% margin erosion and recommended pricing controls.

EDUCATION

B.Tech, Computer Engineering — ABES Engineering College (AKTU) · CGPA 8.45

2023 – 2027

Coursework: Probability & Statistics, DBMS, Machine Learning, Data Structures & Algorithms, Operating Systems

ACHIEVEMENTS

- 2nd Place, ECell Eureka Competition Zonals (IIT Bombay E-Cell); 3rd Place, Retina AI Hackathon 2026 (student dropout-risk prediction)
- 2025 Google Solution Challenge Participant; Google 5-Day AI Agents Intensive Contributor; 300+ DSA problems solved (CodeChef 3★)
- Certifications: Professional Diploma in Social Media Marketing & Management; SQL for Data Analytics; IBM SkillsBuild Data Fundamentals
