

ARNAV SINGH

Full-Stack Developer | MERN • REST APIs • Docker

+91 7428775691 | arnavwork08@gmail.com | [LinkedIn](#) | [GitHub](#) | [Kaggle](#) | [Portfolio](#)

SUMMARY

Full-stack developer and final-year B.Tech Computer Engineering student (CGPA 8.45) who builds and deploys web applications end to end. Shipped ShipTrack, a role-based MERN logistics platform with JWT authentication and a 9-endpoint REST API, live on Render and Vercel. Also designs and containerizes backend services with FastAPI and Docker, including two production-style ML inference APIs, backed by strong DSA fundamentals (300+ problems, CodeChef 3 Star).

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, Java, HTML, CSS

Frontend: React.js, Responsive UI, Component-Based Architecture

Backend & APIs: Node.js, Express.js, FastAPI, RESTful API Design, JWT Authentication, Role-Based Access Control

Databases: MongoDB, PostgreSQL, MySQL

DevOps & Cloud: Docker, Git/GitHub, Vercel, Render, AWS (basics), MLflow

Core CS: Data Structures & Algorithms, DBMS, Operating Systems

PROJECTS

ShipTrack — Full-Stack Logistics Tracking Platform | *React, Node.js, Express, MongoDB, JWT* | [Live Demo](#) · [GitHub](#)

- Built a role-based MERN web application with JWT authentication and role-specific views for each user type.
- Designed a 9-endpoint REST API in Express that enforces data isolation at the database query layer, so each role can only access its own records.
- Developed a live shipment-status timeline in React; deployed the frontend on Vercel and the API on Render.

Credit Card Fraud Detection — Production REST API | *Python, FastAPI, Docker, Render, MLflow, XGBoost* | [Live Demo](#) · [GitHub](#)

- Designed and deployed a REST API on Render with a real-time inference endpoint, containerized with Docker for reproducible deployment.
- Built the data and model pipeline behind it (SMOTE + XGBoost), reaching 0.9752 AUC-PR and 87.5% recall.
- Documented model decisions with SHAP in business-readable form for non-technical stakeholders.

Legal Query Classifier — Containerized Backend Microservice | *Python, FastAPI, Docker, BERT* | [GitHub](#)

- Packaged a fine-tuned BERT text classifier (90%+ accuracy) as a Dockerized FastAPI microservice for production-style inference.
- Documented per-class precision/recall/F1 and known failure modes for future maintainers.

AI-Based Fake Identity & Document Screening System | *Python, OpenCV, EasyOCR, Streamlit* | [GitHub](#)

- Built a modular five-stage processing pipeline (OCR → validation → tamper detection → face verification → risk scoring), with each stage as an independent, testable component.
- Implemented rule-based field validation and ICAO 9303 MRZ check-digit parsing, surfaced through an interactive Streamlit dashboard returning real-time PASS/FLAG verdicts.

EXPERIENCE

Data Analyst Intern — Jambudweep Shodh Kendra Pvt Ltd

Aug 2026 – Present

- Clean and analyze multi-year electoral datasets and deliver trend reports in Excel, validated with statistical correlation tests.

EDUCATION

B.Tech, Computer Engineering — ABES Engineering College (AKTU)

2023 – 2027

CGPA: 8.45 | Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Probability & Statistics

Class XII: 81% | Class X: 92.4% — St. Thomas School, Indirapuram (CBSE)

ACHIEVEMENTS & CERTIFICATIONS

- Solved 300+ DSA problems on [LeetCode](#) and [CodeChef](#); CodeChef rating 1614 (3 Star).
- 3rd Place, Retina AI Hackathon 2026; 2nd Place, ECell Eureka Competition Zonals (IIT Bombay ECell).
- [2025 Google Solution Challenge Participant](#); [Google 5-Day Agentic AI Vibe Coding Contributor](#).
- Certifications: SQL for Data Analytics; Data Science and Machine Learning Fundamentals; IBM SkillsBuild Data Fundamentals.

LEADERSHIP

- Growth & Content Strategist, Aasira – STEM Beyond Labels** (Jul 2024 – Feb 2026): grew audience engagement 35%.
- Volunteer, GDGoC** (Oct 2024 – Sep 2025): raised event attendance 40% through data-driven campaigns.
